MOTORCYCLE FUNERALS

FOR A DIGNIFIED FINAL RIDE

**British Built and
available Nationwide**

Britain's first and only fleet of Motorcycle Hearses
**Triumph, Suzuki Hayabusa, Harley Davidson and
other hearses all available Nationwide**

Our distinctly British motorcycle and sidecar hearses are truly **Proper British Hearses**. Built with actual motorcycles these vehicles became the established UK Industry Standard for motorcycle hearses in 2002.

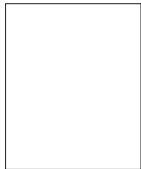

Each hearse is constructed by Motorcycle Funerals Limited to UK Funeral Profession Specifications with a flower rail, pillion seat, internal blower for cooling and de-misting, a glass roof with internal lights to display flowers and artifacts, UK coffin specification fittings and front doors to place the deceased's boots at the foot of the coffin. Each completed vehicle is then examined and legally classified by DVLA as a **hearse**.

These very serious **Proper British Hearses** provide a dignified and tasteful way to say goodbye.
